

Thank you for your purchase!

Hotronix® Heated Lower Platen

Installation is simple.

STEP 1

Remove lower platen.

STEP 2

Insert Heated Lower Platen spindle and secure.

STEP 3

Place controller on sturdy surface, left side of heat press.

STEP 4

Connect power cord to controller and plug into a dedicated 20-amp outlet.

Note: The Hotronix® Heated Lower Platen and the Heat Press each require a dedicated 20-amp circuit for operation. Please allow Heated Lower Platen to completely cool before removing from heat press.
